TWO GOOD MOWERS

No. 10—Gear Drive
No. 9—Chain Drive

When hay is ready to cut, how nice it is to know you have a Johnstone Mower that will "click" along on any kind of ground, cutting a clean, smooth swath in light or heavy grass without any trouble. When you turn into a field with a Johnstone Mower you can rest assured its work will be music to your ears. There are so many good features about these mowers we can only mention a few here. Our No. 10 is gear drive. No. 9 is the same mower, only chain drive. This is to give the buyer preference—some want gear drive, others chain drive. They are roller-bearing throughout, making them very light in draft. Wheels are high, with three pawls, insuring even motion and high power—no jar to knife or lost motion; levers convenient, which.

with the aid of a perfect foot lever, makes it easy to pass obstructions, turn corners, etc., giving full control of bar at all times. Cutter bar always rigid, top—nothing to catch loose clog. Knives are our own make cast iron, just heavy enough to machine any soil and make it work smoothly. Bearings are steel and dust-proof. We also make a one-horse, gear-drive mower that is meeting with particular favor for small farms, orchards, large lawns and parks. Don't buy a mower until you have sent for our 1908 Catalog. Get it today.
